ANYWARE TECHNOLOGY ANNOUNCES STRATEGIC VAR PARTNERSHIPS WITH CODARAM CORPORATION AND RF MICROSYSTEMS

*Resellers Bring EverLink™ Suite of Secure Remote Access and Communications
Software to Two Specific Vertical and Regional Markets*

CITY OF INDUSTRY, CALIFORNIA (Dec. 4, 1998) ... Anyware Technology, Inc., a premier provider of secure remote access and communications solutions, today announced strategic VAR partnership relationships with CODARAM Corporation and RF Microsystems, Inc. Under the terms of the agreements, CODARAM and RF Microsystems will offer Anyware Technology's EverLink™ Suite of secure remote access and communications software as part of their total solutions. CODARAM serves customers in the Southeastern United States, and RF Microsystems services the government sector. The partnerships will strengthen Anyware Technology's sales channels in these specific markets.

CODARAM Corporation is a premier network integrator of data and voice communication products. The addition of the EverLink Suite enhances CODARAM's offerings and gives them the ability to easily deploy a secure, cross-platform communications and remote access solution. CODARAM serves its customers through its network of regional sales offices located throughout the Southeastern United States. Forming a partnership with this distinguished reseller strengthens Anyware Technology's sales presence in this geographic market.

In the government market segment, EverLink offers protection of highly sensitive data with the highest standard of security software. To bring its solution to this important vertical market, Anyware Technology has partnered with RF Microsystems, specialists in providing state-of-the-art security solutions for government agencies and private sector businesses. This partnership strengthens RF Microsystems' ability to provide total, cost-effective secure remote access and communications solutions to its customers.

"We are very pleased to welcome CODARAM and RF Microsystems into our channel partner program," commented Jonathan Page, director of channel sales for Anyware Technology, Inc. "These partnerships are key to our charter of building a strong channel presence that will serve specific vertical markets and geographic regions. CODARAM and RF Microsystems are perfectly

positioned to bring the power, flexibility and cost-effectiveness of our EverLink Suite to their customers.”

Anyware Technology’s EverLink Suite is a peer-to-peer, secure, cross-platform communications and remote access solution that provides private and secure electronic mail, file transfers and instant messaging over wide area networks (WANs), the Internet or intranets. EverLink directly addresses concerns about network security and remote access by uniquely limiting authorized *individual* user access to designated areas of information behind the corporate firewall.

About CODARAM Corporation

Founded in January 1981, CODARAM Corporation is a network design, integration and service expert for end-users who require solutions to Local Area and Wide Area internetworking, ISP Connectivity, ISDN, T-1 Access, Frame Relay, Base Line Studies for LANs, and BellSouth carrier services for business or work-at-home solution. Today, CODARAM has become a premier network integrator of data and voice communication products throughout the Southeastern United States. Headquartered in Alpharetta, Georgia, CODARAM Corporation is a privately held company with a network of regional sales offices located through the Southeastern United States. Visit CODARAM on the World Wide Web at www.codaram.com, or contact the company at (770) 664-3510.

About RF Microsystems

RF Microsystems specializes in providing systems engineering and technical support for government and commercial customers. Programs involve state-of-the-art designs, development, acquisition, integration, operations, test and evaluation of information technology, RF communications, navigation, and electronic warfare systems. RFM provides its customers with top-quality advanced technology products and service while adhering to specified schedules and budgets. RF Microsystems can be reached at (619) 278-1300, or on the World Wide Web at www.rfmicrosystems.com.

In 1997, Advanced Communications Systems, Inc. (ACS) acquired RFM. As with RFM, ACS’s focus is on communications, information systems, engineering, and program management services for defense and commercial clients. Acquisition by ACS has resulted in a harmonious blending of resources and an increase in capabilities for both companies.
